

# Infection Control, Dental Unit Water and CDC Guidelines

Meet Dental License Renewal Requirements while Updating your Infection Control Protocols

BROUGHT TO YOU BY

## GUEST SPEAKER:

Leslie Canham  
CDA, RDA  
Speaker, Consultant, Trainer

"Patients deserve the very best care. All dental procedures must be safe and free from the risk of infection transmission. Gaps in infection control may exist in your practice. If infection transmission occurs it could be detrimental to the practice. This course covers the infection control protocols that protect all patients and dental workers. Create a culture of infection control to protect yourself, your team, and your patients."

- Leslie Canham

- 1 year supply of Sterisil Straws for up to four operatory units will be raffled (valued at \$600.00)
- Bring a water sample from your office for courtesy Total Dissolved Solids (TDS) water sampling.
- Please direct inquiries to either Jane Kriensky of Sterisil 702-281-4569 or Gina Weicht of Benco at 702-274-1001
